Brief reference handling FDA transmissions in cargo releases.

Pre-cargo release

- When cbp rejects then fda rejects:
correct information and transmit 'A' for cargo release
- When cbp accepted but fda rejects:
correct information and transmit 'R' for cargo release
- When cbp accepted and fda accepted:
unable to correct and must create new entry

Post-cargo release

- When cbp accepted and fda rejects:
*correct individual fda line and transmit via
pga correction; *must be fda rejected first*
